## Press Release

**Rockford Engineering Works Ltd.** has incorporated an automation stream into our ever-expanding field of offerings!

We founded this initiative in order to provide our clients with dedicated automation support that complements Rockford's mechanical equipment supply projects and products.

Leading this team is our Director of Automation, Garrett Maynes. Garrett has extensive Electrical & Automation experience in many fields including, but not limited to: Steel & Pipe, Oil & Gas, Mining & Minerals, and Manufacturing.

This growing team specializes in all aspects of Industrial Control Platforms (PLCs, HMIs, Motion), Electrical Design, Machine Safety & Operational Interlocks, and much more. They are well-suited to carry out any automation solution, from concept to commissioning, and have the capability to execute projects both in our plant or on-site.

Contact us today for all your automation needs!
