

Exciting things are happening at Rockford Engineering Works Ltd

Rockford Engineering is very excited to announce their new facility at 2660 Davies Street in Sherwood Industrial Park, north of Regina, Saskatchewan. Rockford celebrated the exciting start to the new building construction with a ground turning ceremony on September 16, 2022. The new building is scheduled to be completed by November 2023.

Left to right: Jeff Doka, President; Brent Bitz, VP of Projects; Garrett Maynes, Director of Automation; Scott Konecsni, VP of Front End.

Rockford Engineering recognized the need for a larger facility to allow for the growth they are experiencing with in-house manufacturing and to continue diversification within Rockford's engineering services.

"This is a substantial investment in our community and province demonstrating Rockford's commitment to being a strong presence in the industrial sector," said Brent Bitz, VP of Projects with Rockford Engineering. *"With an expanding workforce and facility, our new home will allow us to undertake larger, increasingly complex projects while continuing to serve our existing clients."*

The new facility more than doubles the size of the current Rockford office and plant, located at 1734 MacRae Drive in Regina, which is currently listed for sale at the following link:
